Foreword

IN presenting this new catalog to the trade, we desire to lay special emphasis on the up-to-date-ness and superior selling qualities of Ide products.

The Ide Silver Collar Line is certainly as comprehensive as anyone could possibly wish for, and includes not only every approved staple shape but a number of very attractive fast-selling novelties—trade stimulatives.

Ide Silver Collars are authoritative in style and their perfect fitting qualities and durability are proverbial the country over. They are made of material of the utmost staunchness by the most skilled collar craftsmen of the world. They are easy to put on and take off, and have roomy channels which permit the scarf to slip backward and forward with ease. Exclusively—they have Linocord Unbreakable Buttonholes.

All of these points of superiority mean *satisfied customers* for you.

Our exhibition of Ide and Silver Brand White Dress Shirts, Pleated White Neglige, and Colored Shirts is a regular "beauty show." These garments are business bringers if any shirts ever were. The unusualness of the cloths—many of which are specially woven for us—and the many striking patterns attract the most representative trade—the kind you like to see coming into your store.

Geo. P. Ide & Co.

Ide Silver Collars

Ordinary collar buttonholes are made with two threads.

All Ide Silver Collars have the well known Lincord Unbreakable Buttonholes, which are made by running, in addition to the two usual threads, a very strong linen cord.

This cord is made especially for the purpose in England. It is grass or naturally bleached, a process which requires from four to six months.

It costs us a good deal more than the ordinary cord produced in this country, but it positively makes the stoutest buttonholes worked into any make of collar.

This exclusive feature gives the utmost strength where other collars are weak. It prevents the buttonhole from stretching, breaking or tearing out, makes the collars easy to button and unbutton and insures permanent style and fit.

The Lincord Unbreakable Buttonhole is a trade winner and a trade holder for you. It enables you to sell service, satisfaction and style as cheaply as your competitor, handling other brands, can sell style alone.

The Ide Biplax Shirt

(PATENTED)

Two Garments in One. You are here the new Ide Biplax Shirt. It is really two garments in one—Soft Nightgown Shirt and Drawers.

The shirt is made in coat style, but the tails are turned into drawers so the shirt cannot work out of the trousers, and of course there are no drawers to pull down.

Closed Crotch and Closed Back. The crotch is securely closed, and the back is closed as well. The garment buttons all the way down the front and then down both legs. Being two garments in one, it is convenient and having no buttons on the back and no top to button over, it is convenient and comfortable.

Slips On and Off Like a Coat Shirt. All the good features that similar combination garments possess this one has.

And it has, besides several very important capabilities found in no other make. You can, for instance, slip this garment on or off without removing trousers or shoes.

All similar garments of other makes have to be put on like undergarments—over the feet.

Permits Easy Opening at the Back. The Ide Biplax provides the most practical and common sense manner of opening at the back.

Other similar garments button down one leg, leaving the other leg closed. The Ide Biplax buttons all the way down the front as well as down both legs. If a man has worn other garments that button down one leg and found that method satisfactory, he can, of course, simply substitute one leg on the Ide Biplax. But if he desires greater freedom—more leeway—then he will substitute both legs.

Can't Grip, Sag, Bind nor Chafe. The Ide Biplax is slapsy and always retains its shape. It can't grip nor sag in the seat because there is no flap. It can't bind in the crotch because there are no seat buttons to prevent free movement.

Stays Strung and Smooth. Because it is designed right and made right, it always fits. It adjusts itself naturally in every position, and always stays snug and smooth. At no time is there any pulling, chafing or bunching of fabric. In short, the whole garment is made along scientific, close fitting and hygienic lines. And it is the acme of convenience, utility and comfort—the most sensible and practical garment of its kind on the market.

Materials and Workmanship. The materials are such of the regular Ide Shirt cloth as are best adapted to this particular class of garment. The garments are sewed in such a manner as to insure non-ripping seams; the buttons are strongly sewed on; and the buttonholes are worked in extra well and will not break out their use.

In a Class by Itself. The Ide Biplax represents as much of an advance over other similar garments as the letter represented over ordinary shirts and separate drawers. And the whole construction is so simple, so practical, so artistic and so convenient that the wonder is it was never thought of before. All sizes—many different cloths and patterns. Sample Cards upon request.

\$12.50, \$15.00, \$16.50 and \$21.00 the dozen.

Artistic Styles.

The Ide Biplax is also made in artistic style, in two different grades as follows:
N. Y. K. 100—White Mercantile Pique, full sleeves, attached collar, buttoned down English style, \$15.00 the dozen.
N. Y. K. 101—White Mercantile Oxford, half sleeves, attached collar, buttoned down English style, \$16.50 the dozen.

Ide and Silver Brand Shirts

ACAREFUL inspection of the colored illustrations of shirts shown in this catalog will make clear the construction and style of garments which we believe will be most in demand the coming year.

One feature of the line which we wish to particularly mention is that we have added comprehensive assortments of styles with neckbands and soft French cuffs at full range of standard prices. We expect, however, that there will still be a large demand for shirts with detached collars and have not neglected this style.

The line contains many foreign patterns which are exclusive, being designed for us and not to be found in competitors' lines. To the dealer who wishes to show exclusive patterns, therefore, we have a very fine offering.

We have devoted much time and attention during the past year to the tailoring of our garments and feel that today there is no better fitting shirt made. We urge our customers to satisfy themselves on this point by selecting shirts from stock and trying them on normally proportioned men. It will be found that the garments are not only loose and comfortable and of liberal proportions, but that the hang of the shirt gives an effect and appearance, stylish in the extreme. This will be found equally true of the fit of collars, both detached and attached. In fact, our shirts, in this respect, have been made so nearly perfect that we doubt if any further improvement could be brought about.

It has been our policy, for several years, to carry in the branch houses, a line of staple shirts at different prices, including white dress, white pleated negligé shirts with attached laundered cuffs, negligé shirts with soft French cuffs and detached soft collars; also negligé shirts with soft cuffs and attached soft collars. It is not necessary for the dealer, therefore, to stock up heavily on staple styles as they can be readily secured from our branch houses in the same manner as our collars.
